USG Sheetrock® Brand Paper-Faced Metal Tape-On Bead and Trim offer exceptional performance in reinforcing and finishing drywall corners. Designed and manufactured to exacting standards, these products provide outstanding long-term performance and beauty.

## WHAT IS COVERED?

United States Gypsum Company warrants that USG Sheetrock® Brand Paper-Faced Metal Tape-On Bead and Trim are manufactured:

- From high-quality materials meeting a rigid set of specification standards.
- With a special paper covering the metal profile that provides a surface bond to joint compound meeting or exceeding requirements of ASTM C475.
- From corrosion-resistant, galvanized metal that, after installation, will not cause any red rust discoloration or other damage to the final decoration.
- With a coating on the paper covering that resists scuffing and fuzzing from drywall knives and sanding during the finishing process to facilitate smooth, beautiful finishing of the corner.
- Following rigorous and careful monitoring during manufacture to assure high quality and complete customer satisfaction.
- Free from manufacturing defects.

In addition, USG warrants that when applied to a sound structure built on a permanent foundation using recommended application techniques as described in J1356, USG Sheetrock® Brand Paper-Faced Metal Bead and Trim Submittal Sheet, these products will not edge-crack. Inside-offset corners applied horizontally are not guaranteed against cracking. An example would be the apex of a vaulted ceiling.
